

Dedicated to making
quality generic medicines
affordable and available
to everyone

Generic medicines are often a low-cost alternative to brand-name drugs, but in recent years, the price of some generics has increased substantially.

High out-of-pocket costs have forced some consumers to make painful trade-offs, such as cutting back on groceries or putting their health at risk by rationing their medicine—or worse, leaving it at the pharmacy counter because they can't afford it.

CivicaScript is intent on addressing this problem by manufacturing and distributing quality generic medicines at the lowest sustainable price and ensuring that our fair prices are passed on to everyone.

The CivicaScript Model

Created in 2020, CivicaScript started as a partnership with the Blue Cross Blue Shield Association (BCBSA) and 18 independent, locally operated Blue Cross and Blue Shield (BCBS) companies to lower the cost of select generic medicines. CivicaScript now also includes partners Anthem, Health Care Service Corporation and EmsanaRx, who share our belief that the needs of families and patients come first.

As a statutory public benefit company, CivicaScript is deeply committed to the principles of providing affordable, essential generic medicines to promote the social welfare and health of the community. CivicaScript is a sister company of Civica,

Inc., which was created in 2018 as a nonprofit public asset to help prevent shortages of hospital-based medicines –and the price spikes that can accompany them.

Our model is to identify select high-priced generic medicines and work with manufacturing partners to bring them to market at a fraction of their current cost. We then work with like-minded payors, PBMs and pharmacies across the country who pass along the cost savings to their customers.

We anticipate that our approach will deliver hundreds of millions of dollars in savings – which will be passed along to the consumers who rely on these essential medicines.

CivicaScript works with trusted manufacturers to produce low-cost generic medicines.

CivicaScript sells these medicines to pharmacies who pass on the low prices.

CivicaScript members connect patients to participating pharmacies.

Pharmacies dispense CivicaScript's low, fair and sustainably priced medicines.

CivicaScript members report shared savings; CivicaScript publishes data annually.

OUR PRODUCTS

CivicaScript will initially develop and manufacture six to 10 common but high-priced generic medicines for which there is currently not enough market competition to drive down price. The first CivicaScript medicine, abiraterone acetate 250 mg is now available to help treat prostate cancer patients. In addition, CivicaScript is working with Civica, Inc. and numerous partners to bring affordable insulin to market in 2024.

The guiding principle for our portfolio development is to target both specialty and non-specialty generics across multiple therapeutic areas where there is greatest

opportunity to substantially reduce prices. Our portfolio will initially include oral solid products (tablets, capsules); in the future, it also may expand into other patient- or caregiver-administered dosage forms.

Everyone deserves access to the medicines they need to stay healthy. CivicaScript is dedicated to making such access a reality, by providing quality generic medicines that are affordable and available to everyone.

We welcome the partnership of other health plans, employers, PBMs, pharmacies and health care innovators who share our belief that patients should come first.
